

Item	A Ø	Max flow rate m ³ /h	Level of vacuum abs. mbar		Reaction time msec		Mouth Ø	Cross-section of passage mm ²	Pressure at servo-controlled *bar	Weight Kg
			min	max	energ.	de-energ.				
07 03 11	G1/2"	20	1000	0.5	16	40	15.0	176	6 ÷ 8	0.73

* Add the letters LP to the item for servo-controlled pressures 4 - 6 bar.

Note: The coil and the connector are not integral parts of the solenoid valve and, therefore, must be ordered separately (See accessories for solenoid valves).

Solenoid valve servo-controlled power must be supplied with non-lubricated compressed air, 5 micron filtration, according to standard ISO 8573-1 class 4.
